Recommended opening size

Technical Requirement:

1.Product description: It meets the design and test requirements of IEC 62196-II f-2014;

2.Product performance:Voltage rating 440V
Current rating 32A
Dielectric Withstanding Voltage>2000V

3.Appearance of the product: No oil stain, burr or other defects affecting the function of the product are found on the surface of the product.

4.Control dimension: The dimension marked is the key dimension, which needs to be controlled.

5.Environmental protection requirements: products meet RoHs requirements;
